

THE KITCHENAID ARTISAN ESPRESSO MACHINE

For your perfect coffee time

HAMBURG, FEBRUARY 2015. The Artisan Espresso Machine is KitchenAid's gift to coffee enthusiasts around the world, providing the ultimate taste experience. Optimal ease of use, refined features and professional performance are now available for your home, thanks to this premium line of appliances.

The innovative boiler system features separate espresso and steam boilers; this is essential for brewing the best coffee specialities with this attractive portafilter machine. Constant temperature and uniform heat distribution are the components for true Italian espresso with perfect "crema" – as made by a professional *barista*. The steam boiler provides relatively dry steam to froth your milk for creamy *cappuccino*. Two large dials display the actual espresso and frother temperatures on the front of the machine. The Artisan Espresso Machine shuts off automatically after 30 minutes of non-operation. This saves energy and is a reassuring safety feature.

This thoughtfully designed and intuitive professional portafilter machine can accommodate two interchangeable stainless steel filter baskets so you can brew your coffee specialty using ground coffee or paper coffee pods.

On top of all this, the Artisan Espresso Machine is a real eye-catcher: it is available in gleaming chrome, catchy black or stylish colours: Almond Cream, Empire Red, Medallion Silver or Onyx Black. Add to this the standard KitchenAid design and you have a high performer in an attractive package manufactured to the highest standard of quality. Treat yourself to delicious *cappuccino*, bold *espresso* or a full-bodied cup of coffee.
