

THE KITCHENAID ARTISAN FAST CENTRIFUGAL JUICER

KitchenAid presents a powerful juicer

HAMBURG, FEBRUARY 2015. Freshly squeezed orange juice, tasty vegetable juices and delicious smoothies can be part of your daily routine – with the new Artisan Fast Centrifugal Juicer made by KitchenAid, the premium kitchen appliance brand. The extra wide 2-in-1 feed tube allows for fast and easy processing of foods like apples, carrots or beetroot. The extra powerful juicer motor and high rotating speed produce great results even with ingredients that are hard to process.

The streamlined and fast Centrifugal Juicer is ideally suited for large quantities. Up to 2–2.5 litres of juice can be made in one go – that is how capacious the pulp container is. In addition, this new product is intuitive and easy to operate: use the speed selector dial for juicing soft or hard fruits or vegetables. This makes simply dishes and refined creations easy as pie.

A clever drip-stop spout prevents juice from spilling onto the counter. And cleaning the Centrifugal Juicer is as easy as operating it: the juicer's smooth surfaces can be cleaned in a matter of minutes. A juice screen cleaning brush is included.

KitchenAid – Serious About Food

Price:
