

THE KITCHENAID ARTISAN NESPRESSO

Two iconic brands set a new standard: design meets gourmet coffee

HAMBURG, FEBRUARY 2015. Perfect coffee quality combined with well thought out operation and aesthetic design – this is the Artisan Nespresso machine made by KitchenAid.

The innovative capsule loading system sets high standards for quality coffee time. Every coffee lover now can choose from a wide range of 22 varieties of Nespresso Grand Cru coffee capsules – for perfectly custom-tailored brewed coffee. An attractive lever raises the lid on the capsule loading compartment.

Variable volume settings let you select the perfect brew cycle using one of six pre-programmed cup sizes. This delivers optimum quantity Espresso, Ristretto or Lungo. To accommodate different cups – from Espresso cups to Latte and Macchiato glasses – the folding drip grid and flexible cup holder can be adjusted. A disposal container in the Nespresso machine has room for up to 14 used capsules and keeps them away from any water residue for a convenient disposal.

The high quality stainless steel heating element guarantees precise temperature control and fast heating in less than 30 seconds. A powerful, 19 bar pressure pump extracts maximum flavour and creates thick and smooth “crema”. The cutting-edge capsule system features an auto shut-off system; the machine's current status is clearly indicated on the intuitive LED display.

The Nespresso machine can optionally be fitted with the Nespresso Aeroccino. This automatic milk frother lets you create a host of delicate coffee creations and opens up a world full of delicious coffee recipes.

KitchenAid – Serious About Food
